Alumnae/Alumnus Profile:
Laurie Prati, AA, AAS, BAS

Laurie Prati attended the University of Montana, earning her Associates of the Arts and Associates of Applied Science in Energy Technology degrees in 2009, and her Bachelor’s of Applied Science with a Minor in Climate Change in 2010. During her time at U of M, her favorite courses were Alternative Fuels, Environmental Economics and Climate Change, and Communication, Consumption and Climate. Laurie currently works as an Energy Auditor with McKinstry, an Energy Services Company which enables school districts and commercial clients to complete projects that result in reduced energy consumption. She is responsible for utility data analysis, energy calculations, identifying energy saving measures, building computer energy models, report compilation and project support.

Laurie has always been environmentally conscious with a love of the outdoors. Being a hands-on, results-oriented person, she is passionate about educating the future generations, as well as everyone she knows, about the simple things we can all do to be more sustainable and environmentally responsible. Laurie focuses on leading by example, as both a Girls Scout and a Cub Scout Leader, empowering children to reach their full potential by making a difference in their local and global communities.

When Laurie is not working, she can most often be found with her two children, working in the garden, cycling, hiking or camping.

If you would like to contact Laurie she may be reached at 406.550.1176 or at laurie.prati@gmail.com.
