Welcome to ATI.

ATI products are designed to support you throughout your entire nursing education journey, so you can be successful during school, on the NCLEX, and in your professional career.
To help you get started, first log in using your ATI credentials.

If you don’t have this information, use the “Forgot username and/or password?” link from the main sign-on page.
Once logged in, note the features of your home page. You can view the latest news and updates, view your recent activity — where you can quickly access a product you were just in — and easily view your predicted probability of passing the NCLEX.

The account link at the top is where you can edit your profile by changing your e-mail address or updating your institution.

To add products to your account, select the "Add Product" button from your home page.
Enter the product ID (CDN number) provided by your instructor, and all the ATI products within your package will be available to you on the “MY ATI” tab.
The “MY ATI” tab organizes your products to help you find what you need, when you need it.
The “LEARN” tab contains tools designed to supplement your coursework and help you learn in the way that best meets your needs.

Instructional tutorials, ebooks, and flashcards allow you to study at your own pace.

Each product is represented by an easy-to-use visual card.

The product type is designated on the top left of the card.

Use the filters to sort by content area or product type.

You can also add products from this location using the “ADD PRODUCT” button.
On the tutorial product cards, the number of modules in the tutorial is on the “MODULES” button. Beneath the button, you can see the last time you accessed this tutorial and your engagement with this module in the form of a percentage.

The information icon in the top right will give you information about the tutorial, including the name, product ID, source, and when it was added to your account.
For example, NurseLogic is a tutorial to help you improve your test-taking skills and refresh your critical thinking skills in preparation for the NCLEX. It is an interactive and media-rich program.

To access this tutorial — and any others — simply click the “MODULES” button to flip the card.
Tutorials contain instructional lessons and corresponding tests.

Filters allow you to sort the modules by date accessed or name.

Use the module buttons to navigate to your area of study.
Once in a lesson, a complete table of contents is available for easy access by topic.

Video, audio, and interactive features are available to help you master content.

The NurseLogic tutorial presents the ATI Helix of Success.

This model illustrates how knowledge and clinical judgment can prepare you for academic and NCLEX success.
Nursing knowledge is based on which of the following? (Select all that apply).

- Intuition
- Nursing research
- Provider's recommendations
- Discipline-specific research
- Agency policies
Tutorial tests function in the same manner as practice assessments and help measure your knowledge of the lesson content.

For example, the NurseLogic tutorial has two practice tests for each module. The “Beginning Test” is for the start of nursing school, and the “Advanced Test” is for closer to the end of your program.
Question: 7 of 20  ☀️ CORRECT!

A nurse is collecting data on a recently admitted patient. Which test is used to measure tissue perfusion?

- Determining the client's respiratory rate
- Measuring the client's chest diameter
- Obtaining the client's level of oxygen saturation
- Checking the client's depth of respiration

After answering a question, immediately see if you were correct and use the rationales to learn from the question.

Once you use a module feature, the time you spent is recorded to help you keep track of your progress.

A full report of your results is also available for each module.
The ebooks function in a similar way to the tutorials.
The number of available ebooks is on the "EBOOKS" button.
Click the button to flip the card, and then navigate to your desired area of study to launch the ebook.
The ebooks open with the "Contents" tab displayed. Click on the chapter text to begin reading.
CHAPTER 12: Client Safety

Safety is freedom from injury. Providing for patient safety is a primary responsibility.

Many factors affect the client’s ability to protect himself. Those factors include the client’s age, with the young and old at greater risk; mobility; cognitive and sensory limitations; and the potential for self-inflicted injury. Life-threatening factors such as cyanide, alcohol, or barbiturates may be present.

As you study each chapter, you can use the annotations feature. Select the text to make a note, highlight, or add a weblink or hyperlink.
ATI-PLAN: WELCOME TO ATI

There's also a “Bookmarks” tab where you can choose information you want to return to later for review.

When you reach the end of a chapter, there are application exercises to test your knowledge.

You can also access these exercises under the “Quizzes” tab.

All media elements are easily accessible under the “Enrichments” tab.
The “TEST” tab includes practice assessments and proctored assessments.
ATI-PLAN: WELCOME TO ATI

Recent Activity (Last 30 days)

- **IN PROGRESS**
  - PRACTICE ASSESSMENT:
    - RN Mental Health Online Practice 2016 A
  - Test

- **IN PROGRESS**
  - TUTORIAL:
    - NurseLogic 2.0
  - MODULE TEST:
    - Knowledge and Clinical Judgment Beginning Test
  - Learn

- **IN PROGRESS**
  - FOCUSED REVIEW:
    - RN Fundamentals 2016
  - Improve

- **COMPLETED SCORE**
  - 73.0%

    - Learning System RN 2.0
  - QUIZ:
    - Communication
  - Learn

You can also access these products from the “Recent Activity” section of your home page.
ATI-PLAN: WELCOME TO ATI

Note: There are currently no proctored exams in session. When a proctored exam is in session, it will display here.

Other available assessments:

- **Practice Assessment**
  - Nurse's Touch: Informatics and Technology Practice Assessment
  - RN Mental Health Online Practice 2016 A
  - RN Pharmacology 2016

- **Proctored Assessment**
  - Nurse's Touch: Informatics and Technology Proctored Assessment
  - RN Comprehensive Online Practice 2016 B
  - RN Comprehensive Predictor 2016

Practice assessments help you prepare and master content prior to taking a proctored assessment.

The “BEGIN,” “CONTINUE,” and “RETAKE” buttons on each assessment card tell you what stage you are at with each practice assessment.
A client who has a diagnosis of depression is attending group therapy. During the group, ask each member to identify one goal for the day. When it is the client’s turn, she doesn’t respond. Which of the following actions should the nurse take before repeating the request to the client?

- Allow the client time to respond.
- Prompt the client to give a response.
- Move on to the next client.
- Offer the client a suggestion.
**Individual Performance Profile**

**INDIVIDUAL SCORE**

Once you complete your assessment, your performance report automatically generates, providing detailed information on your results.

Your results are also accessible from the product card.

You can also access Focused Review from this location.
CHAPTER 2

LEGAL AND ETHICAL ISSUES

A nurse who works in the mental health setting is responsible for practicing ethically, competently, safely, and in a manner consistent with all local, state, and federal laws. Nurses must have an understanding of ethical principles and how they apply when providing care for clients in mental health settings. Nurses are responsible for understanding and protecting client rights.

LEGAL RIGHTS OF CLIENTS IN THE MENTAL HEALTH SETTING

- Clients who have a mental health disorder diagnosis or who are receiving acute care for mental health disorder are guaranteed the same civil rights as any other citizen. These include the following:
  - The right to humane treatment and care, such as medical and dental care
  - The right to vote
  - The right related to granting, forfeiture, or denial of a driver's license
  - The right to due process of law, including the right to appeal legal charges against another person.

- Some legal issues regarding health care are decided in court using a specialized civil category called a tort. A tort is a wrongful act or injury committed by an entity or person against another person or another person's property. Torts can be used to decide liability issues, as well as intentional issues that can involve criminal penalties, such as abuse of a client.

- State laws can vary greatly. The nurse is responsible for knowing specific laws regarding client care within the state or states in which the nurse practices.

ETHICAL ISSUES FOR CLIENTS IN THE MENTAL HEALTH SETTING

- In comparison to laws, statutes, and regulations (enacted by local, state, or federal government), ethical issues are philosophical ideas regarding right and wrong.
- Nurses are frequently confronted with ethical dilemmas regarding client care (bioethical issues).
- Because ethics are philosophical and involve values and morals, there is frequently no clear-cut, simple resolution to an ethical dilemma.
- The nurse must use ethical principles to decide issues. These include the following:
  - Beneficence: The quality of doing good; can be defined as charity.
  - Example: A nurse helps a newly admitted client who has a psychotic disorder to feel safe in the environment of the mental health facility.
  - Autonomy: The client’s right to make her own decisions. But the client must accept the consequences of the decisions. The client must also respect the decisions of others.
Note: There are currently no proctored exams in session. When a proctored exam is in session, it will display here.

Other available assessments:

- **Practice Assessment**
  - Nurse’s Touch: Informatics and Technology Practice Assessment
  - RN Mental Health Online Practice 2016 A
  - RN Pharmacology 2016

- **Proctored Assessment**
  - Nurse’s Touch: Informatics and Technology Proctored Assessment
  - RN Comprehensive Online Practice 2016 B
  - RN Comprehensive Predictor 2016

Proctored assessments function in a similar way to practice assessments but are only accessible when an instructor is actively monitoring the assessment.

Proctored assessments will appear as available when your instructor is ready to begin the proctoring session.
About an hour after you complete certain proctored assessments, you will also see updates to your ATI Pulse Score.

The ATI Pulse Score shows your predicted probability of passing NCLEX, based on your performance on your first attempt of most Content Mastery Series Proctored Assessments.
The last proctored assessment you’ll take with ATI is the Comprehensive Predictor. Once you finish the Comprehensive Predictor, you can use your Focused Review to create your own study plan.
The “IMPROVE” tab provides you with Focused Review material. This is a personalized study experience based on learning gaps from your assessments.

Once you complete an assessment, your Focused Review will generate automatically.

You can see your assessment score, number of attempts, and your results.

To access a Focused Review, click the “REVIEW” button.
Overview

- Understanding the laws governing nursing practice helps nurses protect clients’ rights and reduce the risk of nursing liability.
- Nurses are accountable for practicing nursing within the confines of the law to
  - Shield themselves from liability
  - Advocate for clients’ rights
  - Provide care that is within the nurse’s scope of practice
  - Discern the responsibilities of nursing in relationship to the responsibilities of other members of the health care team
  - Provide safe, proficient care consistent with standards of care

Sources of Law

- Federal Regulations
  - Federal laws affecting nursing practice
    - Health Insurance Portability and Accountability Act (HIPAA)
    - Americans with Disabilities Act (ADA)

**In addition to the “MY RESULTS” and “IMPROVE” tabs, you can also access your Focused Review from the “Recent Activity” section of your student home page.**
Depending on your school’s ATI package, you might have access to the “APPLY” tab. This area includes highly interactive simulation activities.

You can use these products to apply your knowledge to scenarios and real-world situations.

Use the “ADD PRODUCT” button from this location to add products.

To access simulation modules, click the “MODULES” button to flip the card.
Simulations contain video clinical situations, complete with NCLEX-style questions and detailed scoring.
If you have a Virtual Learning product, it will appear on the “NCLEX PREP” tab.

ATI's NCLEX Live Review takes place in a real classroom with our master’s degree NCLEX specialists.

This live study session covers the essential nursing content aligned with the NCLEX test plan.

This engaging, interactive format reviews all content areas and includes test-taking strategies, critical-thinking exercises, and additional Q&A practice.

ATI’s innovative online prep course, Virtual ATI, covers all nursing content aligned with the NCLEX test plan through collaboration with a virtual NCLEX coach.

Click the “CLASSROOM” button to navigate to your virtual classroom, where you can access your materials and interact with your virtual coach.
Any time you need assistance with ATI products, the “HELP“ section provides a chat feature, videos, quick-start guides, and frequently asked questions to provide you with the support you need to be successful.
Best of luck!

ATI-PLAN®

Welcome to ATI

ATI online materials help you prepare to pass the NCLEX and create a successful start to your career.
Throughout your journey, feel free to contact us at any time with questions.
Best of luck!
